<b>Office Action Summary</b>	Application No. 10/784,523	Applicant(s) KUCHINSKY ET AL.	
	Examiner Andrea N. Long	Art Unit 2176	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-7**, drawn to developing a visual syntax for creating a library of stencils for a biological diagram, **classified in class 717, subclass 143**.
  - II. **Claims 8-29**, drawn to library/database for managing and displaying stencils of biological data, **classified in class 707, subclass 101**.
  - III. **Claims 30-32, 39-41, 43, 49-50**, drawn to text and graphical editing of biological diagrams, **classified in class 715, subclass 530**.
  - IV. **Claims 33-38, 46-48**, drawn to representing biological information as graphical elements for user interaction, **classified in class 715, subclass 763**.
  - V. **Claims 42, 45**, drawn to parsing, matching, and comparing biological diagram consisting of stencils, **classified in class 702, subclass 19**.
  - VI. **Claim 44**, drawn to annotating and linking biological documents with graphical elements, **classified in class 715, subclass 512**.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-V and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are as follows.

Invention I is substantially directed to creating a library of stencils.

Invention II is substantially directed to database for managing stencils.

Invention III is substantially directed to editing of biological diagrams.

Invention IV is substantially directed to representing biological information as graphical elements.

Invention V is substantially directed to matching and comparing biological information.

Invention VI is substantially directed to annotation of biological documents.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 2176

6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrea N. Long whose telephone number is 571-270-1055. The examiner can normally be reached on Mon - Thurs 6:00 am to 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Herndon can be reached on 571-272-4136. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
